

IN THE CLAIMS:

Please amend Claim 1 as follows:

1. (Twice Amended) A device for assisting a person in achieving proper alignment of a portion of the person's body when the person is in position to perform a task, comprising:

a support member to be worn by the person upon the [portion of] the person's body [, the support member comprising a belt to be worn around the portion of the person's body];

a light source attached to the support member, the light source being attached to the support member to [generating] generate a generally linear, alignment beam of light on a surface visible to the person to provide to the person an indication of an alignment of [the] a portion of the person's body when the person is in position to perform the task.
